USE A ZAP GUN ONLY AS A DEFENSIVE WEAPON. This product is suitable to be carried at all times, including walking, jogging, hiking, bicycling, entering or leaving buildings, etc. The ZAP should only be used when you would be justified to prevent an unwanted encounter.

A SHORT BLAST (1/4 second) will startle an attacker, cause minor muscle contractions and can have a repelling effect.

A MODERATE BLAST (1 - 4 seconds) can cause attacker to fall and can cause mental confusion. It may make the assailant unwilling to continue attack, but they will be able to get up almost immediately.

A FULL BLAST of 5 seconds or more can immobilize an attacker, causing disorientation, loss of balance, falling to the ground, weakness and leaving them dazed for several minutes afterwards.

THE ZAP CHARGE will have an effect anywhere on the body, but the maximum effect is in areas marked with an "X" in the drawing.

While using a ZAP Stun Gun, you cannot suffer a charge-back to your own body, even if the attacker is holding you.

BATTERIES: Test fire your ZAP Gun periodically for familiarity, performance and reliability. You should replace batteries or recharge when electrical arc gets weak.

Always keep stun guns out of the reach of children. Keep away from flammable gasses, as an explosion may occur. Must be 18 to purchase. ID check required. Check state and local laws regarding product usage.
